SUMMARY

B.Tech Computer Science (Cybersecurity) student and Software Developer Intern building **AI agents and full-stack applications** with Python, JavaScript, React.js, and Node.js. Hands-on with LLM-powered workflows, REST APIs, and cloud platforms (Google Cloud, IBM Cloud). Shipped projects spanning agentic AI, network intrusion detection, and multi-role web platforms. Targeting AI Engineering and Software Engineering internship roles.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), SQL, HTML5, CSS3
AI / LLM: AI Agent Development, Prompt Engineering, Generative AI (Google Cloud + Kaggle programs), RAG (in progress)
Backend & Frontend: Node.js, Express.js, REST APIs, MongoDB, Firebase, React.js, Next.js
Cloud & Tools: Google Cloud Platform, IBM Cloud, Docker (basics), Git, GitHub, Postman, VS Code
Cybersecurity: Network Security, Wireshark, Scapy, Intrusion Detection, ISC2 Cybersecurity Certification

EXPERIENCE

Software Developer Intern — Nextbite360*Mar 2026 – Present*

- Develop and maintain production web applications using **React.js** and **Node.js/Express.js**, improving responsiveness across deployed platforms.
- Designed and integrated **RESTful APIs with MongoDB**; collaborate in Agile sprints with Git-based workflows and code reviews.
- Currently building an **AI agent** to automate company workflows [add: what it automates + hours saved/week once measured].

Project Developer — IBM Cloud Internship*2025*

- Built **Smart Student Assistant Agent**, an AI-powered academic assistant using IBM Cloud AI services for content analysis and information retrieval.
- Implemented AI-driven learning workflows that improved student research efficiency [add metric: users/queries handled].

PROJECTS

Intrusion Detection via Ethical Packet Monitoring*Python, Wireshark, Scapy*

- Built a network IDS monitoring **real-time packet traffic** to flag unauthorized access using rule-based anomaly detection [add: # of attack patterns detected].
- Applied ethical monitoring and data-privacy principles; code on GitHub (github.com/Koushik744).

Inventory Solution for Affordable Essentials*React.js, Node.js, Express.js, MongoDB*

- Full-stack platform connecting **donors, sellers, and beneficiaries** with role-based access, secure authentication, and scalable REST APIs; deployed on Netlify.

Online Voting Application*JavaScript, Node.js*

- Full-stack voting app with registration, vote submission, and results; enforced **one-vote-per-user** integrity via validation; tested across browsers and mobile.

CERTIFICATIONS

- ISC2 — Cybersecurity Certification (CC) | Google Cloud Skills Boost — Generative AI Learning Path
- Kaggle — Generative AI Intensive | Google Gen AI Academy (Hack2Skill) | Professional Certificate in DevOps — Udemy (2025)

EDUCATION

B.Tech, Computer Science (Cybersecurity) — Malla Reddy University, Hyderabad*2023 – 2027*
CGPA: 8.3/10 | Coursework: Data Structures, DBMS, Operating Systems, Computer Networks, Cybersecurity

LEADERSHIP

- Entrepreneurship Club Coordinator, Malla Reddy University — organized hackathons, innovation workshops, and startup pitch events; mentored peers in startup ideation.
- Volunteer — Vidyadhan Foundation & North South Foundation: education initiatives for underprivileged youth.
